RALLYVISION AI - MATCH PERFORMANCE REPORT

Match: **Test Championship** | Analyzed on 2026-11-04

Player: Test Athlete	**Match Format:** SINGLES	**Opponent:** Kento Momota
Video Duration: 360.0s	**Frame Rate:** 30.0 FPS	**Resolution:** 1920x1080

Key Performance Metrics

Metric	Recorded Value	Benchmark / Context
Total Movement Distance	**420.5 m**	Metric distance on standard court
Average Movement Speed	**6.8 km/h**	Continuous footwork velocity
Peak Movement Speed	**14.5 km/h**	Explosive lunging & sprint bursts
Base Position Recovery Rate	**62.0%**	Target > 55% central reset
Total Detected Rallies	**18**	Avg duration: 8.4s
Total Recorded Shots	**74**	Avg 4.1 shots/rally
Work-to-Rest Ratio	**1 : 0.7**	Active play vs downtime ratio

Tactical Breakdown & Shot Distribution

Shot Category Counts:	SMASH: 14, CLEAR: 28, DROP: 12, NET_SHOT: 10, DRIVE: 10
Court Zone Occupancy:	Front Court: 27.0% | Mid Court: 47.0% | Rear Court: 26.0%

AI Coaching Recommendations & Action Plan

[POSITIONING] Maintain Central Reset Discipline (Priority: LOW)

Evidence: Base recovery consistently met target thresholds.

Drill / Action: Continue split-step timing.

System Disclaimers & Methodology

Measurement Accuracy Notice: Metric distances are computed using 4-point homography projection against BWF standard dimensions (13.4m x 5.18m/6.1m). Shuttlecock speeds on standard consumer footage (<60 FPS) are subject to optical shutter blur and motion inter-frame interpolation

limitations; speed figures are flagged accordingly. Shot classification combines body positioning, reaching height, and spatial trajectory vectors.
